

WORK NOTICE

Former Caterpillar Site

San Leandro, California

May 2006

Field Work Being Conducted on

May 24-26, 2006

The Department of Toxic Substances Control (DTSC) is circulating this work notice to inform the community about changes to the field work on Hutchings Drive, San Leandro. An organic food-grade substance was injected into the groundwater contaminated with volatile organic compounds (VOCs) as scheduled in April 2006. Groundwater samples were also collected as scheduled on May 8, 2006. Naturally occurring bacteria which was scheduled to be injected on May 16 and 17, 2006 will be rescheduled. This work is being completed under an approved Remedial Action Plan Amendment described in a fact sheet issued to the community in October 2005 and at a public meeting on October 25, 2005.

Workers will be on Hutchings Drive, between North Boulevard and Price Way, between 7:30 A.M. and 5:30 P.M. The following work activities will happen:

- **Approximately one quart of the bacteria per location will be pumped into groundwater at 40 locations via 2 inch holes to a depth of 45 feet below ground surface starting May 24, 2006. This work will take approximately 3 days to complete.**
- **Workers wearing safety gear will operate the equipment.**
- **Some parking on Hutchings Drive may be restricted. Traffic will be directed around these locations.**
- **Holes will be filled with a concrete mixture and patched with asphalt after the work is completed at each location.**
